

Monitoring Metrics Future Use

- Monitoring Metrics are NOT set in stone and should be seen as a framework moving forward
- The purpose is to be used to determine whether the GCDAMP is meeting their objectives and goals
- These metrics will help identify where there is limited understanding of resources and help guide us in what adaptations are needed to address any shortfalls
- Metrics will be revisited to determine whether any changes are needed to help the GCDAMP
- These metrics are a transparent way for GCDAMP members and the public to gauge how the program is doing overall
