RE: GLEN CANYON DAM LONG-TERM EXPERIMENTAL AND MANAGEMENT PLAN (LTEMP) DRAFT SUPPLEMENTAL ENVIRONMENTAL IMPACT STATEMENT (DSEIS) – 89 FR 28, February 9, 2024

Oak City's Interest in LTEMP DSEIS:

Oak City is a municipally owned electric utility and Colorado River Storage Project (CRSP) preference customer. Oak City's CRSP allocation provides power to 309 customers and generates on an annual basis 966 KWh of energy for our community. This energy represents about 26% of our annual load, and is a significant and critical resource for us.

Oak City Supports UAMPS' Comments :

As a member of Utah Associated Municipal Power Systems (UAMPS), Oak City supports the comments submitted by UAMPS. In particular, UAMPS joins CREDA's comments addressing the following issues in particular:

1. Insufficient data on which to base decision:
2. Costs to Oak City's customers

Sincerely,

David Steele
