RE: GLEN CANYON DAM LONG-TERM EXPERIMENTAL AND MANAGEMENT PLAN
(LTEMP) DRAFT SUPPLEMENTAL ENVIRONMENTAL IMPACT STATEMENT (DSEIS) –
89 FR 28, February 9, 2024

Washington City's Interest in LTEMP DSEIS:

Washington City Power (WCP) is a municipally consumer owned electric utility and Colorado River Storage Project (“CRSP”) preference customer. WCP’s CRSP allocation provides power to just over 11,800 of customers and generates on an annual basis 2,565 MWh’s of energy for our community.

Washington City Power Supports UAMPS’ Comments :

As a member of Utah Associated Municipal Power Systems (“UAMPS”) WCP supports the comments submitted by UAMPS. In particular, UAMPS joins CREDA’s comments addressing the following issues in particular:

1. Insufficient data on which to base a decision
2. Cost impacts to Washington City Power’s customers

Sincerely,

A handwritten signature in black ink that reads "Rick Hansen". The signature is written in a cursive style and is positioned above the printed name.

Rick Hansen, P.E.
Power Director
