

FLIP CHART #1

Issue Paper #1 –

- approach should be monitoring first, then research

Issue Paper #10 –

- metrics in \$ value

Issue Paper #11 –

- principle #6 -> concern of “RNV” and how it is defined
- eliminate principle #6 or better define

Issue Paper #2 –

- don't know yet if we can manage for both trout and native

FLIP CHART #2

Need better definition of target levels in order to approve MO's (AMWG)

Comment #4 – MO's should be identified as related to GCD operations or not.

Helpful to have linkages between MO's

footnote current levels to improve clarity (% dist. at river miles ...)

#24 reach reach shouldn't discriminate – above/below the Paria

- never mind

ad hoc needs to review “current levels” concern over values -> range preferred

current levels should be referenced (cite literature)

36 – text missing from comment

FLIP CHART #3

64 – should be Issue Paper #2

67 – AMP MO's should be same as recovery plans

90 – levels should reflect natural aging of reservoir
water quality targets really benefit other reservoirs

149 – revise/clarify response to say BHBF's are compatible with SWWF

154 – comment – from tribes due 5/24

MO's 62-64 may go outside the L&R constraints (concern)

185 – why does NPS limit # of white water trips?

FLIP CHART #4

185 – target should include ecosystem goals (consideration by NPS)
include Hualapai Tribe in determining target level

goal 12 – deletion of “within the river corridor” makes the goal less clear

goal 11 & MO78 acknowledge effects of GCPA conflicts with other goals

243 – changing “other” to “traditional” narrows intent of objective
river runners have resources other than cultural which are of concern

Goal 14 – doesn’t relate to dam operations – note this in MO 89

Revise MO89 (broaden funding sources)

FLIP CHART #5

- KAS expert panel recommendation process
- Dave Speas (Fall) update on trout
- Cultural PEP w/PA response (post-July)
- Power revenue presentation
- USGS -> expected changes
- Response to terrestrial PEP
- AMP Strategic Plan process
- Surplus Criteria EIS
- Update on LSSF – preliminary results
- TWG/AMWG travel reimbursement
- IT update (TWG/AMWG)

FLIP CHART #6 (Meeting Review)

Plus

Cookies
Agenda format (meeting materials)
Kept to agenda
Liked the budget tables
PEP presentations good

Minus

rushed on MOs & INs
do your homework
more lead time on budget
more discussion on budget
Strange budget vote process
Mark agenda for decision items
