Subject: Fw: TWG meeting scheduled for September 27-28 in Phoenix

Linda/Dennis -

Below are the items I have for discussion at the 9/27-28 TWG meeting. In addition, I've received a request by Bill P. to have a discussion about Lee's Ferry management objectives. Don't we also need Bill's presentation on what AGFD is doing with monitoring trout in that area (as I remember it his presentation was left off the last meeting due to time constraints)?

A request from Melis for presentations on the augmentation report and other research documents

Also a request by Chris Kincaid for a PA update.

| Subject: TWG meeting scheduled for September 27-28 in Phoenix
|

>-----

Based on the declared availability of most TWG members, it appears that our best shot at a TWG meeting in September (where we can get a quorum) is September 27-28 in Phoenix.

Linda Whetton will send the specific location and the accommodations to you early next week.

An agenda is being prepared and will be sent to members by September 15th. The big ticket items on the agenda at this time are the following:

1. Review of the draft GCMRC Core Monitoring Plan and recommendations from the Core Monitoring ad hoc group
2. Review of the draft Research Plan with a process and timeline for completion
3. Review of a process and timeline for the completion of the '06/07 budget
4. Update of the Geomorph workshop process
5. Nominations and selection of a TWG Chairman for '05

Please submit other agenda items to me and Dennis for consideration.

Subject: Re: DRAFT AMWG Agenda

All,

I concur with Helen's earlier comments on the agenda. Maybe we can use some of the unallocated time on the second day. For the MLFF effects, I assume you are talking about the same update that was given to the TWG at their last meeting on the report that our cooperators produced and Ted reviewed? If so, put Ted down to do that again. I understand that Clayton is asking for an update on concurrent sampling issues and someone from the Bureau should discuss the memo that was sent to Mike on that topic (USGS was not a signatory). Thanks.

Subject: Re: DRAFT AMWG Agenda

Here are a couple of initial comments on the proposed AMWG agenda for October:

1) Agenda shows Mike Berry scheduled to make two separate 15 minutes presentations related to PA program membership on the second day. Is this a mistake or intentional? Perhaps Mike B or Mike G would want to use one of those slots to discuss status of federal agency review of the tribal consultation plan?

2) I thought the main purpose for having this "extra" AMWG meeting in October was to review status of program planning and get AMWG input for development of the FY06-07 workplan. I would like to see more time carved out of the schedule for GCMRC staff to make presentations on the contents of the core monitoring plan, since this plan will form a significant part of the 06-07 workplan and budget. Right now there is a two hour block set aside to discuss four different plans (GCMRC strategic, Core monitoring, Long Term Experimental, and HBC plan). The GCMRC strategic plan update won't require much time, but the HBC, LTE and core monitoring plans are likely to generate considerable interest and discussion. Suggest we need at least a full hour and a half (preferably two hours) to review and discuss the contents of the core monitoring plan, in addition to whatever time folks feel is necessary to review and discuss the status of the other three plans.

Helen
