

SCORE Report Update

Prepared for the Glen
Canyon Dam Adaptive
Management Work
Group

November 30, 2005

USGS Publication Policy

- “All data and information gathered through investigations and observations by the staff of the USGS and by its contractors, while on official duty, must not be disclosed to others until the information is made available to all, impartially and simultaneously through Director-approved formal publication or other approved means of public release, except to the extent that such release is mandated by law.”

(500.14 - Safeguard and Release of U.S. Geological Survey Data and Information)

SCORE Report Update

- Peer and editorial reviews have been successfully completed
- USGS National Wetlands Research Center is preparing the report for publication
- Printed reports will be available for the Oct. Science Symposium

Table of Contents

- Foreword
P. Patrick Leahy, U.S. Geological Survey Acting Director
- Background and Introduction
- 1. Influence of Glen Canyon Dam Operations on Downstream Sand Resources of the Colorado River in Grand Canyon
- 2. Fishes of Grand Canyon
- 3. Climatic Fluctuations, Drought, and Flow in the Colorado River
- 4. Water Quality in Lake Powell and the Colorado River

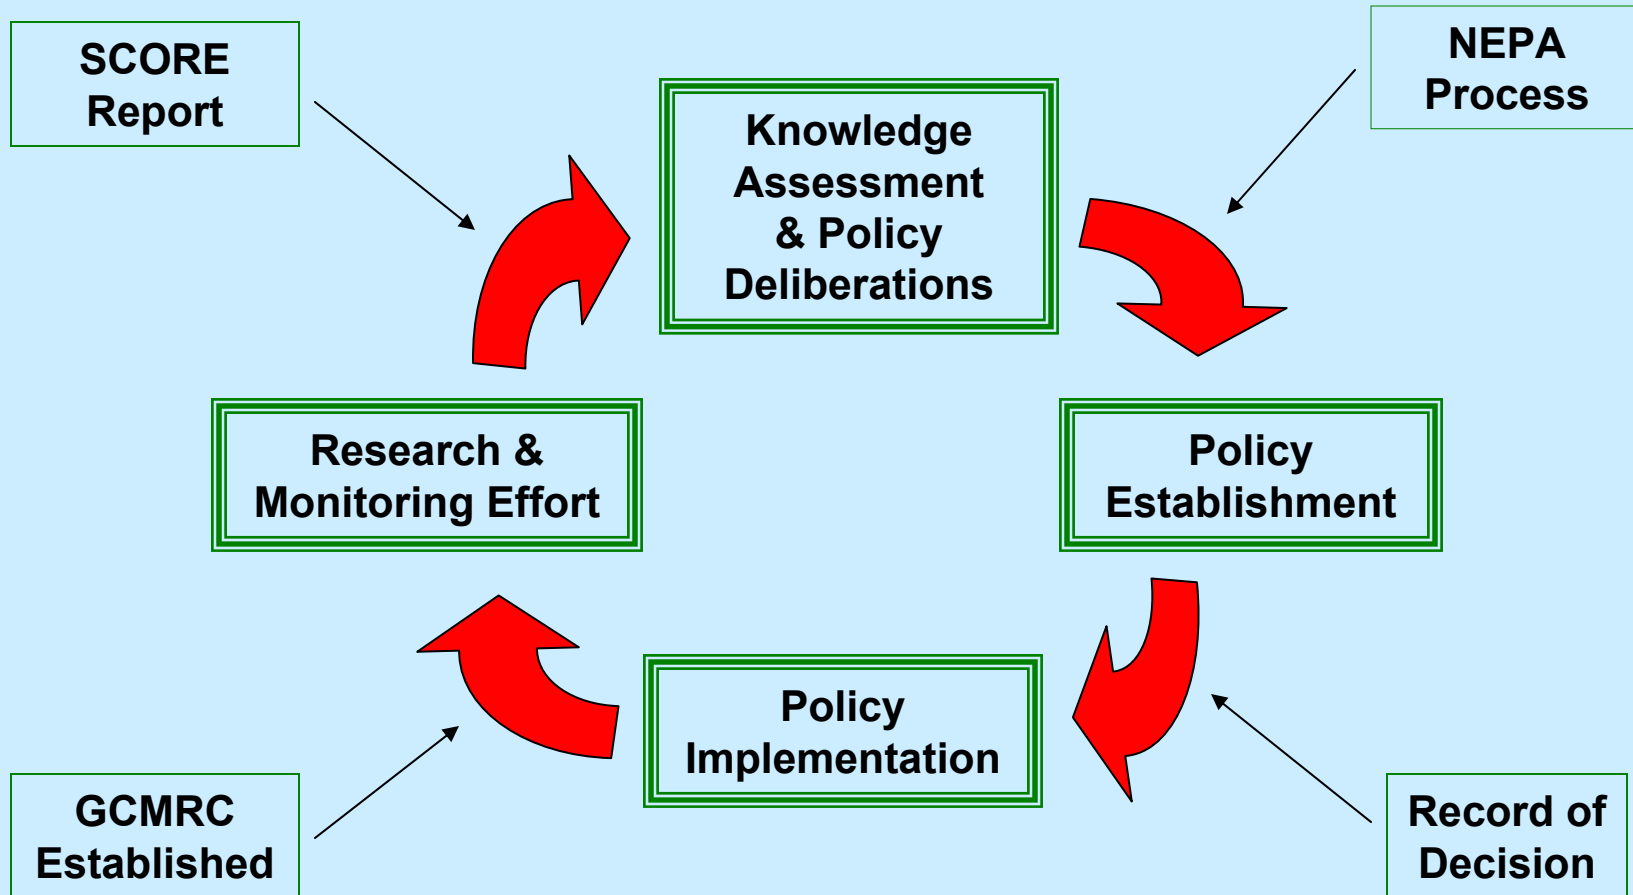

Table of Contents (cont.)

- 5. Aquatic Ecology: the Role of Organic Matter and Invertebrates
- 6. Riparian Vegetation and Associated Wildlife
- 7. Birds of the Colorado River in Grand Canyon: A Synthesis of the Status, Trends, and Dam Operation Effects
- 8. Debris Flows in Grand Canyon and Rapids of the Colorado River
- 9. Recreation Use Values and Nonuse Values of Glen and Grand Canyons

Table of Contents (cont.)

- 10. Hydropower Production at Glen Canyon Dam: Status and Trends
- 11. Cultural Resources in the Colorado River Corridor
- 12. Recreational Values and Campsites in the Colorado River Ecosystem
- 13. Lessons Learned from 10 Years of Adaptive Management in Grand Canyon

Glen Canyon Dam Adaptive Management Program

Structure of the GCDAMP

Goals of the GCD AMP

- Restore CRE ecological health, maintain water and power services provided by GCD as mandated by 1992 GCPA.
- **The Question Becomes:** Can the CRE be restored through changes in dam operations, and other actions within existing legal frameworks and at an acceptable cost?
