

Foodbase Upate

Current *Gammarus* Density in Lees Ferry is Similar to Early 1990s

Notes: Error bars represent 1 Standard Error.

--Error bars from 2006 are larger than for AZGFD data because of differences in sample size.

--Density estimates for both AZGFD and 2006 are for cobble bar and depositional habitats combined.

--*Gammarus* density on cliff faces and talus slopes in Summer 2006 averaged 6,000 individuals/m².
