* Items in italics are annually occurring at the same meeting. (continued on next page)
* ## denotes actions which will require AMWG approval before the TWG could work on these, but planning requires that we consider the potential impact of these items.
* AMWG annual meetings: August and March
* TG (Technical Group): December-February: attend GCMRC December meeting and then meet to evaluate technical merits of program and provide a report to TWG at February meeting. In 2008-09 this might be abbreviated, including attending the Science Symposium and then limited meetings with GCMRC to discuss specific programs. This might include meetings at GCMRC in January and February, or conference/web meetings.
* Web conferencing: TWG should consider the use of 1-2 web conferences a year between meetings to handle important business which arises. For example, GCMRC might need initial review and comment on a project/plan in between meetings, a web conference is a perfect way to receive the report, discuss the proposal and provide input or approvals. Four hour duration or less for very specific topics.
* BAHG: January: review of draft initial biennial budget with recommendation to TWG for February meeting. March-May: review detailed draft biennial budget and workplan for recommendation to TWG at June meeting.
* FWS updates: includes progress on meeting conservations measures (all currently applicable), Lower Colorado River Recovery Implementation Program (LCRIP), implementation of HBC Comprehensive Plan, Genetics Management Plan
