

Tony H. Joe, Jr., Supervisory Anthropologist,
Navajo Historic Preservation Department

GLEN CANYON ADAPTIVE MANAGEMENT PROGRAM

AREAS OF CONCERN

- ✘ Reintroduction of native plant and trees.
- ✘ Invasive Species dominate the river corridor.
- ✘ Flash floods in Paria River contribute to sediments being washed out and more erosion become evident by August.

GOULDINGS WILLOW

- ✘ 2014 Navajo Trip highlighted areas for proposed reintroduction of the Gouldings Willow Tree.
- ✘ Collaboration with Hualapai Tribe and Helen Fairly.
- ✘ Take clippings from other sources.
- ✘ Can only be translocated and planted in fall and winter months.

GOODING'S WILLOW

PRIORITIES FOR REINTRODUCTION

- ✘ Re-introduction of the Gouldings Willow tree in selected areas. Areas where they once grew in abundance
- ✘ Collaborative effort with the Hualapai tribe
- ✘ One boat trip with focus on budget increase and funding for similar projects
- ✘ Highly positioned stakeholders invited

MEDICINAL AND CEREMONIAL USE

- ✘ Plants are requested by elders and chanters
- ✘ Spring water is collected for ceremonial use
- ✘ Plants collected are used in ceremonies
- ✘ Tobacco
- ✘ Native plant reintroduction
