

# Glen Canyon Dam Adaptive Management Program Technical Work Group Meeting, January 26, 2023

## ACTION ITEMS, MOTIONS, and VOTES

### MOTIONS

#### **Adoption of Meeting Minutes**

Seth Shanahan, SNWA and TWG Vice-Chair, approved the meeting minutes from October 12-13, 2022 with changes received from Larry Stevens, GCWC.

### VOTES

#### **Motion on the Nonnative Fish Strategic Plan:**

*The TWG provides the draft Nonnative Fish Strategic Plan, as developed through the Smallmouth Bass Ad Hoc Group, to the Adaptive Management Work Group for their consideration in response to the Acting Secretary's Designee's request from the August 2022 AMWG meeting.*

[Larry Stevens, Grand Canyon Wildlands Council (GCWC)] Moves to adopt the motion.  
[Craig Ellsworth, WAPA] Seconds the motion. [Seth Shanahan, SNWA] The motion does not have consensus, so the following voice vote was taken per TWG operating procedures:

**Hualapai:** Not present

**Hopi:** Yes, because it contains mitigation language and multiple options

**Zuni:** No, cannot support a plan that contains lethal management options

**CREDA:** Yes, but with WAPA's reservations about excessive amounts of bycatch

**All others:** Yes.

**[Seth Shanahan, SNWA]** Motion passes with a majority vote

### NEW ACTION ITEMS

- Request to include a link to the Action Items and Motions document in future agendas.
- Martina Dawley (Hualapai) requests that Reclamation assist with a visit to the Southwest Native Aquatic Resource and Recovery Center in Dexter, New Mexico, to learn more about the razorback sucker hybridization study.
- Kirk Dongoske, Pueblo of Zuni, requests that Reclamation visit the leaders of the Zuni Tribe regarding the 14-day review period for the nonnative plan.
