# Annual Reporting Meeting – How it Fits In

4/8/25

## LTEMP ROD

App. B §1.4 "...DOI will hold GCDAMP annual reporting meetings for all interested stakeholders; these meetings will present the best available scientific information and learning from previously implemented experiments and ongoing monitoring of resources."

§6.1(e) GCMRC will continue "...reporting monitoring and research results...and developing annual research and monitoring reports..."

§6.1(g) Roles and functions of AMWG (next slide)

### **AMWG Charter**

#### Roles and Functions of the AMWG

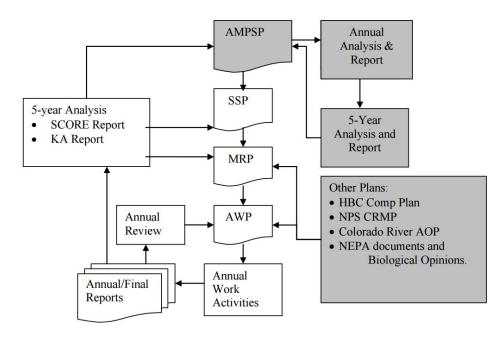

§4(f) "Annually review long-term monitoring data to provide advice on the status of resources and whether the AMP goals and objectives are being met."

§4(g) "Review and provide input on all AMP activities undertaken to comply with applicable laws, including permitting requirements."

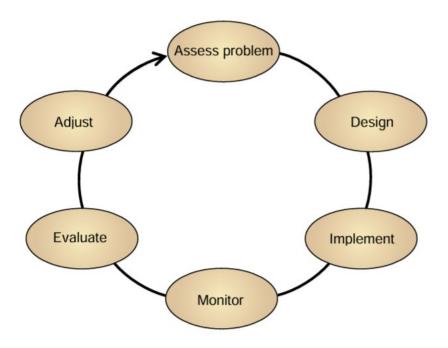

# TWG Operating Procedures

"...to consult with GCMRC in developing criteria and standards for monitoring and research programs; develop resource management questions for the design of monitoring and research administered by the Grand Canyon Monitoring and Research Center (GCMRC); and provide information, as necessary, for preparing annual resource reports and other reports, for the AMWG."

# Adaptive Management

**Figure 2.** Collaborative science planning and implementation process. The Glen Canyon Dam Adaptive Management Program and the U.S. Department of the Interior have lead responsibility for the shaded boxes. The Grand Canyon Monitoring and Research Center has lead responsibility for the boxes that are not shaded.

**Figure 1.1.** Diagram of the adaptive management process.

## Year-2 (2025)

Budget and Work Plan

Annual reporting meeting (1-2 days) followed by 1-day TWG meeting with a primary emphasis on reporting results/findings/scientific advances on previous work plan.
