As such, would you be able to meet (Thu-Fri) June 22-23? Please let me know as soon as possible. Thank you.

I thought I would forward this paper along as it seems germane to our current deliberations, although I have been assuming you have all seen this already (never assume!). This recently published paper highlights the importance of near shore rearing habitats for humpback chub. I've cc'd Linda on this to forward on to the TWG. I can't remember if this was sent to the TWG already.

Linda,

I am interested in having an hour of the next TWG meeting devoted to new, recently published sediment conservation results (2-20 min slots for Topping and 1-20 minute slot for Hazel). This information pertains to the ongoing planning efforts for sediment testing in the next five-year phase.

Please forward this information to Kurt for me and let me know what the status of the agenda is at this point?

Thanks,

Ted

We had a quick snowfall yesterday but everything in the valley has pretty much melted.
