

Flaming Gorge Technical Working Group
Meeting Notes
Monday, May 29, 2018

Attendees: Jed Parker, Heather Patno, Ashley, Nielsen, Don Anderson, Tom Chart, Matt and Randy, Dan Schaad, Peter Crookston

1. Hydrology summary:
 - a. Yampa not falling out as quickly as was forecast on the previous Friday. Flows will continue to put water into Stuart Lake along with larvae.
2. The short bypass release to 6,600 will be likely be reaching Stuart Lake within 48 hours, providing a pulse of flow to enhance operations.

Review of baseflows:

1. Typically target 2,000 at Jensen when Pikeminnow emerge, early as June 15th, July 1st.
2. Decreased below average baseflow, until target reached, then increase by 50 cfs until we get to target.
3. Dave – Tom, have overview of recovery program discussion to take place on June 28th.
